

# INSTALLING PHONE CENTRAL

When activating Enhanced Voice Mail, Garden Valley will initially send you an email for the installation of Phone Central. Once you have received the email you may begin.

Step 1: Simply click on the link provided in the email to install the application.

Step 2: Click run twice.

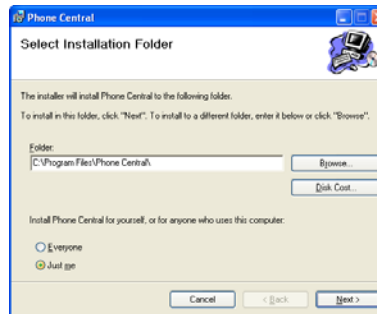

Step 3: At the set up wizard screen, click Next.

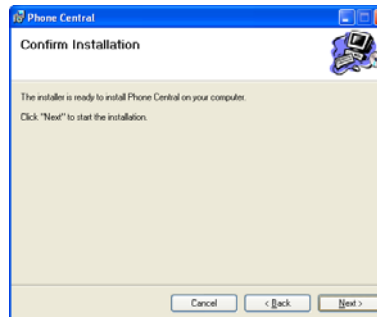

Step 4: In the Phone Central Options window, choose the sections and click Next. "Run Phone Central on Startup" will set Phone Central to launch each time the PC is started. "Start Phone Central After Install" will launch Phone Central immediately after installation is complete.

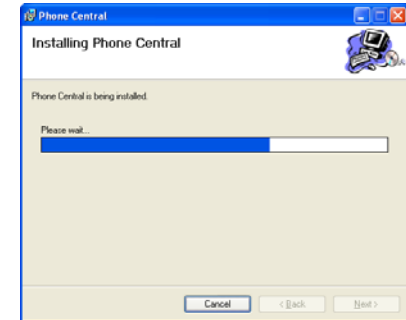

Step 5: Allow Phone Central to install to the defaulted folder. If there are multiple users on this PC, select that Phone Central runs for everyone who uses the PC or just for you.

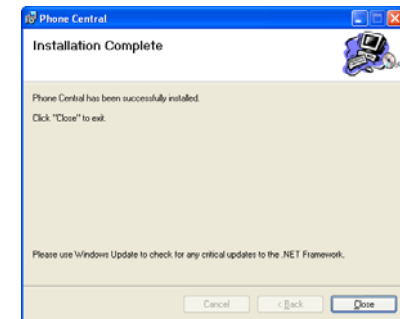

Step 6: Click next to start installation

Step 7: Phone Central will start and the status bar will display progress.

Step 8: When the installation is complete, this window will display. Click Close.

If you indicated that Phone Central should start after the installation was complete, you will be prompted to log in.

The first time you login to Phone Central, your default password is 0000 and your username is your email username without the extension (@gvtel.com). You may then go under settings to change your password.

*Phone Central does require Microsoft Media Player 9 and .NET (1.1 minimum) applications to run properly.*
