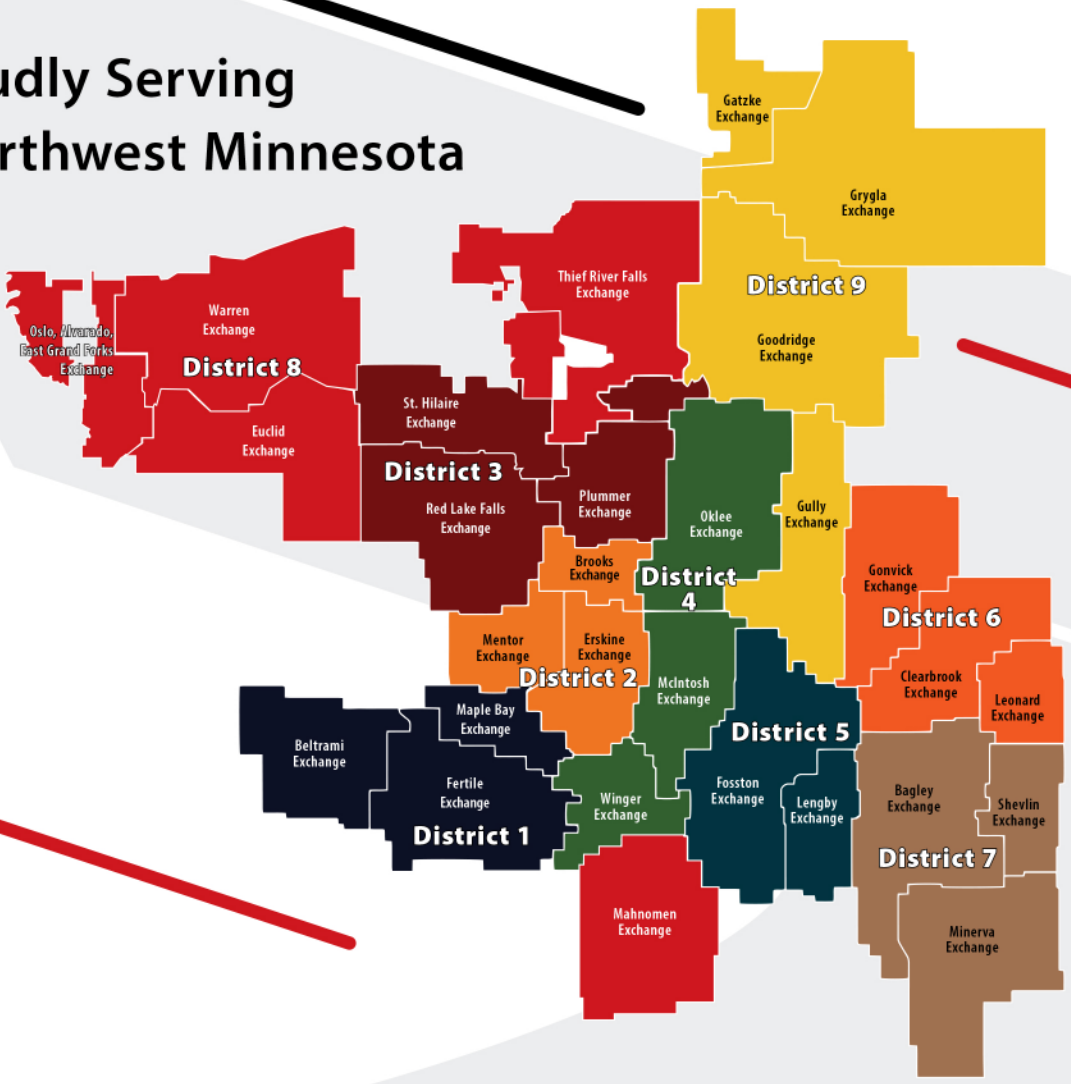
Proudly Serving Northwest Minnesota



Voted #1
by the People We Serve

Readers of the Thief River Falls Times, Northern Watch, and Crookston Watch, **recognized GVT in four categories.**

2025 Best of the Northwest Awards

- ★ **Best Place to Work – Large Business**
- ★ **Best Internet Service Provider**
- ★ **Best Satellite or Cable Provider**
- ★ **Best Electronics Store**

These recognitions reflect the connections we build with the people we serve every day and are an honor we do not take lightly. While we are proud of these awards, we are especially grateful for the trust you place in us and the future we are building together.

"It's nice to be able to call and talk to a real human that you understand and gets things taken care of. I highly recommend GVT to all my family and friends..."

- Alfred Houdek

Proud to be your trusted connection

WHERE CONNECTIONS COME TO LIFE

PRESIDENT'S MESSAGE

Jim Ferden
President & Director | District 4

Welcome to the 121st Annual Meeting of Garden Valley Technologies!

Since 1906, this Cooperative has been built on a simple but powerful idea: when neighbors come together to serve one another, great things can happen. What started as a small effort to bring communication to rural communities has grown into something those early members could only imagine.

And yet, in the most important ways, our purpose hasn't changed. Because at Garden Valley Technologies, connection has never just meant wires, signals, or speed. It means staying in touch with family. It means running a business from Main Street or a farmstead. It means reaching help in a moment of need. It means sharing life's milestones, big and small. Those are the moments where connection comes to life.

Each service that Garden Valley provides plays a role in keeping you connected to what matters most. A reliable connection helps a student succeed. It allows a local business to grow and compete. It ensures access to healthcare and emergency services.

And sometimes, it brings a community together in a very visible way. As I write this article, I was reminded that it has been 10 years since Garden Valley Technologies launched its local school and community channels. What started as a simple idea has become an important part of how we stay connected as a community.

From school concerts and sporting events to local celebrations and church services, these channels capture the moments that define who we are. It might be a grandparent who can't make it to a game on a cold winter night, but can still watch their grandchild play from home. Or a family member working late who can still catch a concert or ceremony they otherwise would have missed. Those are simple moments, but they mean everything.

These everyday connections remind us of the impact Garden Valley Technologies has on our communities, both in the ways we stay in touch and in the tangible benefits we receive as members.

Speaking of those benefits, I also wanted to highlight that in 2025, Garden Valley Technologies elected to retire $10.2 million in capital credits.

Over the past year, we've continued to invest in your network to ensure that no matter where you live, you have access to reliable, high-quality service. At the same time, we've stayed committed to the local services that bring our communities together. That work takes dedication. I want to recognize our employees who work hard every day to serve you. Their commitment and pride in this Cooperative are what brings our mission to life.

As we look ahead, technology will continue to evolve, and expectations will continue to grow, but our focus will remain the same. We will continue to invest. We will continue to adapt. We will continue to serve you.

Because after more than a century, we understand something that hasn't changed: It's not just about providing connections. It's about what those connections make possible. It's about neighbors working together. It's about communities staying strong. And it's about making sure that right here, where we live and work, connections don't just exist, they come to life.

As I wrap up, I'll admit something, I had a little help from artificial intelligence (AI) in putting this message together. But rest assured, while AI may have assisted with the words, the meaning behind them is entirely ours. The pride we have in our Cooperative, our commitment to the communities we serve, and the value we place on each of you reflect the heart of the entire Garden Valley team.

To our member-owners, thank you. On behalf of everyone at Garden Valley Technologies, we are grateful for your support, your engagement, and your trust, because that is what makes this Cooperative strong, not just today, but well into the future. Thank you again for being a part of Garden Valley Technologies.

Tim Brinkman
CEO/General Manager

As we reflect on 2025, I am both proud of what we have accomplished and energized by what lies ahead.

For nearly two decades, Garden Valley Technologies has been engaged in two of the most ambitious efforts in our Cooperative's history, **bringing world-class fiber connectivity to the communities we serve and expanding our footprint to our unserved neighboring communities.** Through the support of our members and the effective use of state and federal grant programs, we are nearing the completion of this transformational chapter.

In many ways, 2025 marks a transition, and 2026 will represent a milestone.

In 2022 we finished bringing fiber-to-the-home to 100 percent of our traditional service area. We anticipate that 2026 will be our final year of large-scale, grant-funded construction and network expansion. After years of aggressively building and extending our footprint, we are approaching the point where our focus must shift. This does not signal an end to our progress, but rather an evolution in how we deliver value.

The foundation has been laid. Now, we build upon it.

Our attention will increasingly turn toward **maintaining, enhancing, and optimizing the network we have worked so hard to create**. This includes upgrading key components, improving resiliency, and completing projects that were deferred during the peak construction years. Just as importantly, we will remain focused on growing our subscriber base across both our incumbent (ILEC) and competitive (CLEC) service areas to ensure we fully realize the value of our investments.

Connectivity is no longer a luxury; it is **essential infrastructure, supporting everything from education and healthcare to agriculture, business, and everyday life** in the communities we serve. As we look ahead, we are focused not only on maintaining the strength of our network, but on continuously improving how we operate and deliver service. This means embracing innovation in practical, meaningful ways. We are actively evaluating how emerging technologies, including artificial intelligence, can help us operate more efficiently, better anticipate network demands, and respond more quickly to potential issues before they impact our members. From enhancing network monitoring and predictive maintenance to improving customer interactions and streamlining internal processes, these tools present opportunities to elevate both reliability and service. Importantly, we are working hand in hand with several of our key vendor partners to help shape how these technologies are thoughtfully integrated, not only within Garden Valley, but in ways that can be scaled and implemented across rural networks nationwide. **Our goal is not to adopt technology for its own sake, but to lead in applying it where it delivers real value, making our network stronger, our operations smarter, and the overall experience better for the members who rely on us every day.**

This year also brought important developments beyond our day-to-day operations. The decision by the United States Supreme Court in June 2025 regarding the constitutionality of the Universal Service Fund (USF) provided valuable clarity and breathing room as we plan for the future. **USF remains a critical component of our ability to serve rural communities** as a large percentage of our revenues are derived from USF support, **helping to offset the high cost of building and maintaining broadband networks across our expansive, low-density service area.** Without this support, the cost of providing service would increase significantly, placing a greater burden on our members. USF plays a vital role in ensuring that the rates our members pay remain affordable and comparable to those in more densely populated areas. Protecting and sustaining this program is essential not only to our Cooperative, but to the future of rural connectivity nationwide. While uncertainty remains at the federal level, this outcome reinforces the importance of continued advocacy and disciplined financial stewardship.

While the nature of our work is evolving, our purpose is not. As we move beyond the peak of construction and into a new phase of stewardship and optimization, our focus is shifting toward strengthening how we operate and enhancing the network we have built. By **embracing innovation, investing in smarter operations, and working alongside our partners to help shape the future of technologies like artificial intelligence, we are positioning Garden Valley Technologies to lead, not just adapt**, in the years ahead. The work is far from finished. In many ways, it is just beginning.

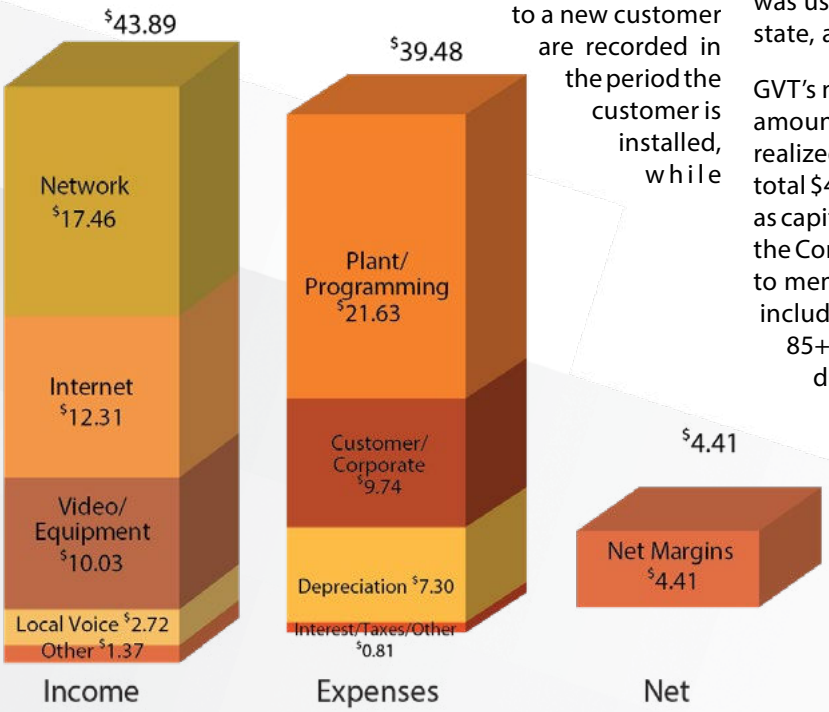
TREASURER'S REPORT

Casey Holland
Treasurer & Director
District 5

Garden Valley Technologies (GVT) had another busy year in 2025, as the financial statements reflect. GVT continued to build out grant awarded projects with placement of over 120 miles of mainline fiber and making over 190 new connections to local residential and business locations in the rural East Grand Forks and Mahnomen exchanges. In our 31 exchanges, covering 4,700 square miles, we have installed more than 7,150 miles of fiber optic cable in the ground to serve our Cooperative members.

Due to our strong operating results, we were able to generate $10.5 million in net cash from operations and accomplish this growth while decreasing debt by $4.8 million. Operating expenses increased 4.6% (excluding depreciation) to accommodate for resources needed to manage customer growth within our CLEC areas, in addition to increasing demand for services inside our traditional service territory. Revenues increased by 1.7% or $0.7 million. Revenues normally lag expenses as the costs of connecting to a new customer are recorded in the period the customer is installed, while revenues are recorded over time. Much of the revenue growth from our efforts in 2025 will be realized in the year 2026 and after.



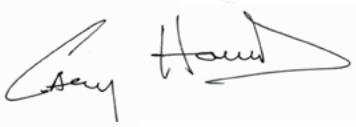
The graph below illustrates the sources and distribution of GVT's $43.89 million of operating revenue and other income in 2025. As shown by the bar on the left, 40% of the Company's income—$17.46 million—was derived from members' network access revenues. A significant portion of network access revenues comes from Universal Service Fund assistance to carriers serving high-cost rural areas. GVT continues to strive to bring high-quality affordable services to the rural areas we serve in addition to expanding services to surrounding areas. GVT has more fiber in the communities it serves than the vast majority of communications companies in the nation.

Income generated in 2025 includes $2.72 million in local service revenues; $10.03 million from video and equipment sales; and $12.31 million in Internet sales; with the remaining $1.37 million from other sources such as gain on sale of marketable securities, unrealized loss on investments, directory advertising, long distance, interest on investments, and other services.

The middle bar summarizes GVT's 2025 expenses, totaling more than $39.48 million. Operating and maintaining our plant facilities cost $21.63 million, which includes video programming and Internet access charges; customer and corporate expenses amounted to $9.74 million, including administration, customer service, legal, directory, and billing and accounting functions; and $7.30 million in depreciation of plant facilities was allocated in 2025. GVT's plant-in-service totaled $184.23 million as of December 31, which is a $4.17 million increase over 2024 (including the net impact of retirements). Finally, $0.81 million was used for the payment of interest on RUS loans and federal, state, and local taxes.

GVT's net income for 2025, as illustrated by the bar on the right, amounted to $4.41 million. After excluding unrealized losses and realized gains on investment securities, the allocable margins total $4.32 million. These margins will be distributed to members as capital credits in proportion to their respective patronage with the Company. In 2025, GVT paid out $3.5 million in capital credits to members who had service with the Cooperative since 2003, including payouts to estates of our deceased members, and the 85+ early payout program. The board also approved another discounted capital credit program which was conducted in 2025 and paid out $3.24 million in January of 2026.

It has been my privilege to serve as the Company's Treasurer and, on behalf of the Board of Directors, I want to thank you for your continued support.



GVT Retires Over $10.2 Million

THROUGH CAPITAL CREDIT PROGRAMS

Garden Valley Technologies continued its commitment to returning value to members in 2025 through several forms of capital credit retirements. These distributions reflect the strength of the cooperative model, where member participation directly contributes to shared success and long-term community investment.

In total, more than **$10.2 million in capital credits were elected to be retired in 2025, resulting in nearly $7 million paid directly back to members** through a combination of regular distributions, special programs, and member-specific retirements.

A significant portion of this total was driven by the **Discounted Capital Credit Payout Program**. While the program **returned $3.24 million** in cash payments to members, it resulted in the retirement of approximately $6.4 million in capital credits due to the 50% discount applied. This voluntary program once again saw strong engagement, with 3,090 applications submitted, representing an 11.9% response rate. Members were offered the opportunity to receive 50% of their allocated capital credits from 2004 through 2024 as a one-time discounted payout. Due to the program's $3 million cap, recipients were selected through a randomized process conducted by independent auditing firm Olsen Thielen. Ultimately, 1,735 members were selected, receiving an average payment of $1,878. The success of this program highlights members' appreciation for flexible access to their capital credits while reinforcing the Cooperative's financial stability.

In May 2025, GVT completed its **regular annual capital credit distribution, returning $2,475,128** to members. This distribution retired 100% of capital credits from 2003 and 20% from 2024, continuing the Cooperative's steady progress in returning margins to members over time.

GVT also provided important financial support to members and their families through **estate payouts, totaling $842,705** across 301 estates. These retirements ensure that a member's investment in the Cooperative is returned to their estate upon death, offering meaningful assistance during times of transition.

Additionally, the Cooperative honored its commitment to long-standing members through the **85+ Capital Credit Payout Program**. In 2025, 119 applications were approved, **distributing $404,854** to members aged 85 and older who requested full retirement of their remaining capital credits. This program recognizes the loyalty of long-term members and provides them with access to the value they helped build.

Together, these programs demonstrate the cooperative difference. Unlike traditional companies, Garden Valley Technologies operates for the benefit of its members, returning margins back to the people and communities it serves. **Retiring more than $10 million in capital credits in a single year** not only provides direct financial benefits to members, but also strengthens local economies, supports families, and reinforces the value of membership in a cooperative.

As GVT looks ahead, member participation and engagement will continue to guide decisions around capital credit programs. The Cooperative remains committed to balancing strong financial health with meaningful returns, ensuring that the benefits of membership are felt both today and for generations to come.

A Decade of Local Stories,

Student Talent, and Community Connection.

Celebrating 10 years
of school partnerships and community programming operated by local students and Media Club advisors.

Where It All Began
Win-E-Mac School became our first Local Channel partner, launching GVT Channel 30 and laying the foundation for what would grow into a network of 10 community channels.

WEM School - Channel 30
Launched 2016

From one school to a growing network of 10 local channels, this partnership continues to expand opportunities for students and communities alike.

400+ school events aired for the 2025/26 school year with an average of 49 events aired each month.

27,000+ hours of GVTV local channel viewership occurred between January - March 2026.

355,000+ website page views of the Local Channels since 2020.

6,080 non-member subscribers purchased online access since the 2020 launch.

Watching from Near and Far

Viewers are tuning in from across the region and beyond, including as far as Texas.

"Garden Valley has been an exceptional partner. Their support gives students real-world learning opportunities while delivering an invaluable service to our community."

GVT Donated Over $11,000
to Local Food Shelves

The Garden Valley Technologies Board of Directors approved a $1,000 donation to 10 local food shelves throughout the GVT service area in December 2025. This decision reflects our commitment to supporting those in need and giving back to the community that is an integral part of our cooperative's success.

Throughout 2025, GVT donated $11,080 to local food shelves through this initiative and additional community donation requests. We were also proud to support the Thief River Falls Prowler Pantry, Red Lake County Central's Satisfy the Hunger Backpack Program, Challenger Elementary Food Shelf, and the Plummer Holiday Train.

We recognize the vital role food shelves play in ensuring that everyone in our community has access to nutritious meals, especially during the holiday season. These donations reflect our ongoing commitment to supporting the tireless efforts of local food shelf organizations and their dedicated volunteers. Deeply rooted in the communities we serve, GVT is proud to support the well-being of our neighbors and remain connected to the needs of our communities.

Local Food Shelves Supported by GVT:

Clearwater County Food Shelf - Bagley

FB Area Food Shelf - Fertile

Grace Community Food Shelf - Erskine

Grygla-Gatzke Food Shelf - Grygla

Helping Hands Food Shelf - Mahnomen

Inter-County Community Council Food Shelf - Oklee

Loaves & Fishes Food Shelf - Fosston

Red Lake Falls Community Food Shelf - RLF

Thief River Falls Area Food Shelf - TRF

Warren Area Food Shelf - Warren

Connecting Youth

To Washington, D.C.

Garden Valley Technologies was proud to sponsor **Gracey Gunderson of McIntosh** and **Hayden Shulstad of Red Lake Falls** on an unforgettable journey to Washington, D.C. through the Foundation for Rural Service (FRS) Youth Tour.

As part of the FRS Youth Tour, students gain valuable insight into the telecommunications industry while exploring historic landmarks and connecting with peers from across the country. The experience offers a unique opportunity for students from rural communities to better understand government, leadership, and the role rural America plays in shaping the future.

STUDENT REFLECTIONS

Gracey Gunderson shared:

"Thank you, Garden Valley, for sponsoring me on this incredible trip, definitely one of the highlights of my high school years! This experience is one I'll remember for the rest of my life.

One of my favorite parts was making new friends and exploring all around Washington, D.C. It was amazing to meet so many new people and connect with others from all over the country. Getting the chance to see so many important landmarks that we don't typically see in our rural areas really opened my eyes. It reminded me how much small towns like ours contribute to the bigger picture of this country.

It may have been hot, but it was absolutely worth it for the unforgettable memories made with people from all across the U.S. Thank you again for making this incredible opportunity possible!"

Hayden Shulstad shared:

"Participating in the FRS Youth Tour of Washington, D.C. was an unforgettable experience that deepened my understanding of our nation's government and history. Through engaging conversations with local government representatives, I gained firsthand insight into the political process, which inspired me to stay informed and involved in my community.

We toured the U.S. Capitol, where history and democracy come to life, and enjoyed a scenic ferry ride along the Potomac River. We also had the opportunity to meet with leaders connected to the Federal Communications Commission (FCC) and learn about future plans for broadband expansion in rural Minnesota.

Later, we explored Mount Vernon, visited the national memorials, and toured several museums, along with Arlington National Cemetery, where we paid our respects to those who served.

This experience, made possible by Garden Valley Technologies, allowed me to witness the foundations upon which America was built. It has broadened my perspective and strengthened my commitment to civic engagement and community service."

Supporting opportunities like the FRS Youth Tour is one of the many ways GVT invests in the future of our communities. By connecting students to new experiences, we help shape the next generation of leaders.

2025 ANNUAL MEETING MINUTES

The annual meeting of members of the Garden Valley Telephone Company d/b/a Garden Valley Technologies (GVT) was held in the Win-E-Mac school auditorium near Erskine, Minnesota, on Tuesday, June 3, 2025, conducted by Director President Arlene Novak, Director Secretary Allen Paulson, Director Treasurer Lee Hoaas, and CEO/GM Tim Brinkman. Registration of members began at 9:30 a.m. with entertainment provided by "The Wood Picks". This Annual Meeting was also made available on GVT's local channels and available to live stream via the internet.

President Novak, upon being informed by Secretary Paulson that a quorum was present (as indicated by the registration of 203 members including employees and Directors), and called the meeting to order at 10:31am.

The meeting opened with Reverend Pam Thorson leading the invocation.

Erskine American Legion Post 596 conducted a Presentation of Colors and President Novak asked everyone to join in reciting the Pledge of Allegiance.

Secretary Paulson presented the 'Notice of Annual Meeting', which together with the printer's 'Affidavit of Publication' from the Erskine Echo, are made a part of these minutes as Exhibit A and constitute the required notice of meeting.

A motion was duly made by Gladys Luecken, seconded and unanimously carried, to dispense with the reading of the minutes of the annual meeting held June 4, 2024, and approve the minutes of said meeting as recorded.

President Novak introduced the Company's board of directors.

CEO/General Manager Tim Brinkman invited members to visit the displays and discussed the Annual Meeting prize drawing procedure. Manager Brinkman mentioned this meeting agenda does not include an intermission for district caucuses to meet and nominate directors, due to the By-Law Amendments that were adopted at the 2023 Annual Meeting. Manager Brinkman stated that Secretary Paulson will discuss in more detail later in the meeting.

President Novak welcomed members to the cooperative's 120th annual membership meeting and presented the President's message.

President Novak then called on Treasurer Hoaas to review the cooperative's financial results for 2024.

Following this report, President Novak called for a motion to accept the treasurer's report as presented, a motion was made by Craig Burslie, seconded and unanimously carried.

President Novak then introduced to the stage Marshall McKeever, Senior Business IT Account Technician at Garden Valley, for a brief Cybersecurity presentation.

Following Marshall McKeever's presentation, Manager Brinkman thanked him and introduced additional guests from CNS, Paul Solsrud, and Olson Thielen, Gavin Burnham.

Manager Brinkman announced the random winner of the Grand Prize, $150.00 bill credit, selected by the randomizer consisting of all GVT subscribers, as Elizabeth A. Baker of Thief River Falls.

Manager Brinkman presented his report.

Manager Brinkman then called on Secretary Paulson to discuss the Director Seats.

Secretary Paulson presented on the Director Seats.

President Novak opened the floor to questions from the membership. President Novak, Manager Brinkman, and CFO Steve Mueller answered questions presented to them, if any.

President Novak then asked if there was any old or new business to be discussed or presented. Nothing was raised.

President Novak then gave recognitions to the Win-E-Mac School for the use of the school's facilities, Erickson's Smokehouse who prepared the hot meal today, Opdahl's Donuts, Groceries Plus, America Legion Post 596, The WoodPicks for entertaining us, Jocelyn's Greenhouse, Reverend Pam Thorson, Golf Cars Plus for donating the use of the golf carts, Marshall McKeever for presenting here today, to Garden Valley Members for attending or viewing the 120th Annual Meeting, and to Garden Valley employees for their efforts in making the meeting a success.

Prior to the meeting, a gift (a battery powered lantern) from the cooperative was offered to everyone in attendance. Manager Brinkman also reminded attendees that more prizes would be awarded after adjournment.

Upon a motion duly made by Deloris Dalby, seconded and unanimously carried, the meeting adjourned.

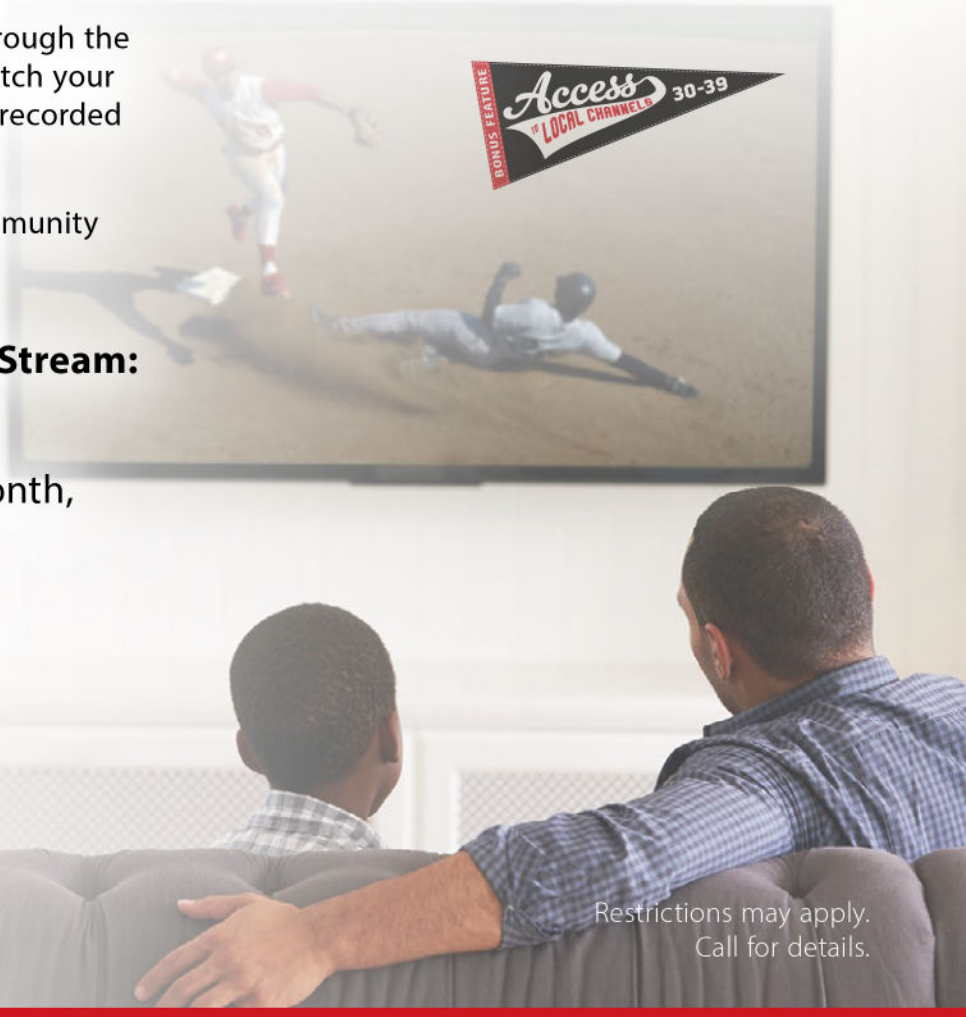
A Simpler Way to Watch TV with GVT Stream

Watch your favorite channels and local programming
without a traditional cable box.

What is GVT Stream?

GVT Stream is your TV service delivered through the internet instead of a cable box. You can watch your favorite channels, local programming, and recorded shows on your TV, phone, or tablet.

Watch local sports, school events, and community programming from anywhere.



Here's What You'll Get with GVT Stream:
